

# PHISHING SCAMS: HOW TO STAY PROTECTED

According to a recent report by Ironscales, phishing scams are the root cause of **95% of all successful cyberattacks worldwide.**

## TOP 5 RED FLAGS

Web links lead to unfamiliar sites (hover over them to check!).

There's an attachment you weren't expecting.

You notice poor spelling and grammar throughout (this is on purpose!).

It asks for personal information like passwords or bank information.

The sender doesn't address you by name.

## HOW TO STAY PROTECTED

1

Don't click any links or attachments you can't verify with total certainty.

2

Call to verify requests (even if it seems to come from someone or somewhere you know!)

3

When in doubt, contact your IT team for help!
